**The European Garden Flora: A Manual for the Identification of Plants Cultivated in Europe, Both Out-of-Doors and under Glass (Volume 6)** From Brand: Cambridge University Press

The European Garden Flora is the definitive manual for the accurate identification of cultivated ornamental plants and has been designed to meet the highest scientific standards. The vocabulary has nevertheless been kept as uncomplicated as possible so that the work is fully accessible to the informed nurseryman, gardener, and landscape architect, as well as the professional botanist. Volume VI concludes the Flora and contains accounts of 38 families of dicotyledons, including Compositae (with over 190 genera), the largest family of flowering plants. Many other genera of horticultural importance such as Calceolaria, Penstemon, Hebe, Solanum, Buddleia, and Sencio are also discussed. Comprehensive keys are provided at the level of family, genus and species and line diagrams are included to illustrate important diagnostic features of critical taxa. References are made to useful illustrations and taxonomic accounts, and a small amount of guidance on cultivation is also included for many genera.

## **Editorial Review**

### **Review**

"[A]n important reference to all interested in garden plants and plants in cultivation...an essential reference to those who are interested in introductions and invasive plant species." Botanical Electronic News

"...it is an invaluable reference for gardeners and botanists in North America...the editors have produced a reference book that is a fitting tribute to their monumental research, as well as setting a precedent for those interested in continuing the tradition of horticultural taxonomy." Systematic Botany

## **Users Review**

### **From reader reviews:**

#### **Minerva Gagliano:**
