Common Fragrance and Flavor Materials: Preparation, Properties and Uses

By Horst Surburg, Johannes Panten

This 6th edition is thoroughly revised and updated, and now additionally includes all commercially important flavor and fragrance materials that entered the market over the past 10 years.

In one handy and up-to-date source, this classic reference surveys those natural and synthetic materials that are commercially available, produced, and used on a relatively large scale, covering their properties, manufacturing methods employed, and areas of application.

For this new edition the chapter on essential oils has been completely revised with regard to production volumes, availability, and new product specifications, while new legal issues, such as REACH regulation aspects, are now included.

Finally, the CAS registry numbers and physicochemical data of over 350 single substances and 100 essential oils have been updated and revised.

Editorial Review

Review

"...The excellent and concise introduction to this unique industry is followed by extensive information on nearly 500 of the most used fragrance and flavor compounds. Names, molecular formula, physical data, odor and flavor descriptions, uses, and a number of processes for the larger volume chemicals are all included. Successive chapters deal with essential oils, animal secretions, quality control, toxicology and literature. The formula, name and CAS registry number index are invaluable and timely additions." - Perfumer and Flavorist

"...Data that would normally have to be selected from many different books are available in one source with this book...with over 800 citations throughout the text, this is a nearly inexhaustible source of information." - Euromaterials

"In the meanwhile this book is a classical wide-spread and well-known publication for everybody involved or interested in flavor and fragrance and for individuals active in perfume and flavor applications, for example food technologists, chemists and even laymen." - Advances in Food Sciences

"...This book provides a lot of useful information in one place, and it is an especially good resource for somebody just entering the flavor and fragrance industry." - Journal of Medical Chemistry

"You'll find much information in this book not found in other works." - Foster's Herb Business Bulletin

"Particular useful for natural product chemists, those in the product development and the curios." - Herbalgram

"...In conclusion, this work is highly recommended to all readers as a source of valuable information." - Organic Process Research & Development Journal, 09/2007

From the Back Cover

Get a good start in flavor and fragrance chemistry!

This book presents a survey of those natural and synthetic fragrance and flavor materials which are commercially available, produced and used on a relatively large scale and which are important ingredients for the creation of fragrance and flavor compositions because of their specific sensory characteristics, e.g., smell, taste. It provides information on their properties, methods employed in their manufacture, and their areas of application.

From Reviews to the 4th Edition, the former standard work "Bauer-Garbe":

"...The excellent and concise introduction to this unique industry is followed by extensive information on nearly 500 of the most used fragrance and flavor compounds. Names, molecular formula, physical data, odor and flavor descriptions, uses, and a number of processes for the larger scale production of chemicals are all included. Successive chapters deal with essential oils, animal secretions, quality control, toxicology and literature. The formula, name and CAS registry number index are an invaluable and timely addition." - Perfumer and Flavorist

'...Data that would normally have to be selected from many different books are available in one source with this book...with over 800 citations throughout the text, this is a nearly inexhaustible source of information.' - Euromaterials

About the Author

Dr. Surburg was senior vice president global innovations of the Scent & Care department at Symrise AG and retired recently. He studied chemistry at Kiel University and joined Haarmann & Reimer (now Symrise) in Holzminden, Germany, in 1980. Horst Surburg originally researched natural chemical materials, before specializing in the synthesis of aromatic and cosmetic substances as well as developing methods for their production. He has been a co-author of Common Fragrance and Flavor Materials since 1990.

Dr. Panten has been head of the New Molecules Fragrances department at Symrise since 2002. He studied chemistry at Kiel University, before joining the R&D department at DRAGOCO (now Symrise) in Holzminden, Germany, in 1991. His main research areas are the synthesis of aromatic substances as well as developing methods for their manufacture.

Users Review

From reader reviews:

Kathy Wilson:

This Common Fragrance and Flavor Materials: Preparation, Properties and Uses book is simply not ordinary book, you have it then the world is in your hands. The benefit you have by reading this book will be information inside this publication incredible fresh, you will get details which is getting deeper a person read a lot of information you will get. That Common Fragrance and Flavor Materials: Preparation, Properties and Uses without we comprehend teach the one who looking at it become critical in contemplating and analyzing. Don't possibly be worry Common Fragrance and Flavor Materials: Preparation, Properties and Uses can bring whenever you are and not make your bag space or bookshelves' turn out to be full because you can have it inside your lovely laptop even cellphone. This Common Fragrance and Flavor Materials: Preparation, Properties and Uses having excellent arrangement in word as well as layout, so you will not experience uninterested in reading.

Bert Ferguson:

Reading a reserve can be one of a lot of pastime that everyone in the world really likes. Do you like reading book thus. There are a lot of reasons why people fantastic. First reading a reserve will give you a lot of new facts. When you read a publication you will get new information mainly because book is one of several ways to share the information or maybe their idea. Second, reading a book will make an individual more imaginative. When you examining a book especially fictional book the author will bring that you imagine the story how the personas do it anything. Third, you could share your knowledge to other individuals. When you read this Common Fragrance and Flavor Materials: Preparation, Properties and Uses, you may tells your family, friends in addition to soon about yours e-book. Your knowledge can inspire the mediocre, make them reading a e-book.

Bernard Lewis:

Your reading sixth sense will not betray you, why because this Common Fragrance and Flavor Materials: Preparation, Properties and Uses guide written by well-known writer whose to say well how to make book that can be understand by anyone who read the book. Written throughout good manner for you, dripping every ideas and writing skill only for eliminate your hunger then you still uncertainty Common Fragrance and Flavor Materials: Preparation, Properties and Uses as good book but not only by the cover but also with the content. This is one book that can break don't assess book by its protect, so do you still needing an additional sixth sense to pick that!? Oh come on your reading through sixth sense already alerted you so why you have to listening to one more sixth sense.

Manuel Rose:

What is your hobby? Have you heard in which question when you got learners? We believe that that problem was given by teacher for their students. Many kinds of hobby, All people has different hobby. Therefore you know that little person similar to reading or as reading become their hobby. You need to understand that reading is very important and book as to be the thing. Book is important thing to add you knowledge, except your teacher or lecturer. You get good news or update with regards to something by book. Many kinds of books that can you go onto be your object. One of them is Common Fragrance and Flavor Materials: Preparation, Properties and Uses.
