Computer-Mediated Communication: Issues and Approaches in Education

By Sigrid Kelsey

While the majority of Internet users reside in industrialized nations, online access in the developing world has risen rapidly in recent years. As emerging technologies increasingly permit inexpensive and easy online access, the number of Internet users worldwide will only continue to expand.

Computer Mediated Communication: Issues and Approaches in Education examines online interactions from different national, cultural, linguistic, legal, and economic perspectives, exploring how the increasingly international and intercultural Internet affects the ways users present ideas, exchange information, and conduct discussions online. Educators, researchers, and practitioners will discover ways to effectively use Web-based technologies, transcending barriers to participate and collaborate in international projects that reflect the scope and scale of today's global interactions.

Editorial Review

Review

... [E]ven within face-to-face educational settings, online technologies enhance learning and help present alternative educational options to students. Educators can and should embrace such methods to experience them now and to prepare for the next innovations. --*Loriene Roy, Professor, School of Information, The University of Texas at Austin, USA*

About the Author
