The Orthodox Corruption of Scripture: The Effect of Early Christological Controversies on the Text of the New Testament By Bart D. Ehrman

Victors not only write history: they also reproduce the texts. Bart Ehrman explores the close relationship between the social history of early Christianity and the textual tradition of the emerging New Testament, examining how early struggles between Christian "heresy" and "orthodoxy" affected the transmission of the documents over which many of the debates were waged. He makes a crucial contribution to our understanding of the social and intellectual history of early Christianity and raises intriguing questions about the relationship of readers to their texts, especially in an age when scribes could transform the documents they reproduced. This edition includes a new afterword surveying research in biblical interpretation over the past twenty years.

"In sum, this book is a fine work of scholarship --innovative, judicious, alert, attentive both to its overarching argument and to the supportive details. . . Ehrman's work is provocative and should give rise to further reflection. "This is a book well worth reading. The New Testament scholar will find in it an excellent study of textual criticism, systematically organized under the rubric of scribal *Tendenzen*. The systematic theologian as well as the student of early Christian thought will find in it an excellent expose of the fashion in which conviction colors the way in which one reads the tradition."--*Journal of Early Christian Studies*
