## Creation in Crisis: Science, Ethics, Theology By Joshtrom Kureethadam

The book offers a broader and holistic understanding of the contemporary ecological crisis, weaving together the physical, moral, and religious dimensions of the problem into a unitary whole, as a triple cry of the Earth, of the poor and of the gods.

In our present day, the ecological crisis gets mostly reduced, unfortunately, to a mere 'environmental' problem, or even a host of them. We do not realize that it is our very 'common home' that is in peril. The first part of the book explores how Earth came to be gradually shaped as a home in the larger context of cosmic evolution. However, in a very short time, human activities have begun to threaten the very capacity of Earth to be a home for humanity and for the rest of the biotic community. This is our current situation and such a global predicament is the starting point of the book.

The remaining parts of the book offer a wider and integrated view of the crisis facing our common home. It is done by describing the ecological crisis - symbolically as well as in reality - as a triple cry of the Earth, of the poor and of the gods.

The cry of the Earth, in the second part of the book, offers a physical description of the contemporary ecological crisis, based on authoritative studies from the scientific community. The first of the challenges dealt with is climate change along with some of its major impacts like extreme meteorological events, the melting of glaciers, and sea level rise. The other problems discussed in the physical understanding of the crisis include species extinction and biodiversity loss, the pollution of land, water and air, waste, and the depletion of natural resources. The ecological predicament is truly a global crisis as it threatens the whole of our common home and affects all of our common household, both human and non-human communities. The crisis rings bells of alarm, as in the case of climate change, or biodiversity loss, we are crossing into perilous *terra incognita*, dangerously close to critical tipping points.

The ecological crisis is not merely a physical problem. It has a human face, as explained in the third part of the book, entitled the cry of the poor. The crisis has deleterious impacts on some of the most basic areas of human life like nutrition, health and shelter. The crisis has a disproportionate impact on groups that are

already vulnerable like women, children, indigenous groups, minorities, and not the least, the future generations. As the impacts of the ecological crisis impinge on the fundamental human right to a dignified life, questions of eco-justice are bound to emerge. The tragic realization that the crisis will hit hardest the poor and the most vulnerable - precisely those who have contributed least to causing the crisis, makes the contemporary ecological crisis one of the greatest ethical dilemmas of our age.

In the fourth part of the book, symbolically entitled the cry of the gods, the deeper spiritual dimension of the crisis is explored. The ecological crisis results primarily from our inability to look at the physical world as God's creation, as God's own home. We have become increasingly blind to the sacramental dimension of creation, the primordial revelation of God's goodness and glory. The ecological crisis results from our disobedience of the very first commandment given to humanity, namely, to be responsible stewards of God's creation. The crisis also reveals how we have ignored the ultimate destiny of all creation to enter into God's own Sabbath, as the whole universe will be recapitulated in Christ.

The main argument of the book is that it is important to look at the contemporary ecological crisis from a triple perspective: physical, moral and theological, and all at once, in order to gain a total view of our ecological predicament, and commensurate with the true magnitude of the challenge facing our common planetary home.

### Editorial Review

#### From the Author

The book offers a comprehensive understanding of the contemporary ecological crisis as a triple cry of the Earth, of the poor, and of the gods. The author begins by evidencing how the ecological crisis is about our common home that was moulded over billions of years of cosmic evolution, and which is currently being imperilled by human activities. In the physical description of the crisis, problems of global warming and associated climate change, biodiversity loss, pollution of land, water and air, and the fast depletion of natural resources are dealt with. The crisis is also moral for the fact that its disproportionate victims are the poor communities who have contributed least to causing the problem in the first place. At a still deeper level, the ecological crisis is also a profoundly spiritual crisis, as it results primarily from our inability to look at the physical world as God's creation, the primordial revelation of divine goodness and glory. The book skilfully weaves together the physical, moral, and religious dimensions of the problem into a unitary whole, and argues that it is only a holistic view of the crisis that can awaken us to the true magnitude of the unprecedented challenge facing our common home.

#### From the Back Cover

**"During the past ten years, but particularly during the pontificate of Pope Francis, concern for the poor and the exploited earth has moved from the periphery of Catholic theology to the core of what it means to be a Catholic. I warmly welcome this timely and exciting book, which draws on the latest science, ethics, and theology to craft a new understanding of how humans can relate in a creative and non-exploitative way with the rest of God's creation."**

**- Sean McDonagh,  
author, *To Care for the Earth***

**"Scientists, ethicists, and general Readers alike will find much to ponder and reflect upon in this Comprehensive look at the contemporary ecological crisis. This book bridges multiple disciplines to depict why problems like biodiversity loss, food security, and deforestation should concern everyone. And Kureethadam's concluding theological reflections on sin and conversion in an ecological age represent an important inflection of ecological theology and ethics in the Catholic tradition."**

**- Christiana Z. Peppard,  
author, *Just Water***

#### About the Author

Joshtrom Isaac Kureethadam is a professor at the Salesian Pontifical University in Rome and a Catholic priest; His background is in cosmology, and he currently holds the Chair of Philosophy of Science at the Salesianum.

### Users Review

#### From reader reviews:

**Tamera Duckett:**

Have you spare time to get a day? What do you do when you have far more or little spare time? Sure, you can choose the suitable activity with regard to spend your time. Any person spent their particular spare time to take a move, shopping, or went to the actual Mall. How about open or perhaps read a book titled Creation in Crisis: Science, Ethics, Theology? Maybe it is to become best activity for you. You already know beside you can spend your time along with your favorite's book, you can more intelligent than before. Do you agree with their opinion or you have other opinion?

**Gerald Warfield:**

As people who live in the particular modest era should be update about what going on or details even knowledge to make these people keep up with the era and that is always change and make progress. Some of you maybe may update themselves by examining books. It is a good choice in your case but the problems coming to an individual is you don't know what type you should start with. This Creation in Crisis: Science, Ethics, Theology is our recommendation to make you keep up with the world. Why, as this book serves what you want and want in this era.

**Robin Millard:**

This book untitled Creation in Crisis: Science, Ethics, Theology to be one of several books this best seller in this year, this is because when you read this e-book you can get a lot of benefit in it. You will easily to buy that book in the book shop or you can order it by using online. The publisher in this book sells the e-book too. It makes you more easily to read this book, as you can read this book in your Mobile phone. So there is no reason to you to past this publication from your list.

**Mary Otter:**

In this age globalization it is important to someone to receive information. The information will make you to definitely understand the condition of the world. The condition of the world makes the information much easier to share. You can find a lot of referrals to get information example: internet, paper, book, and soon. You can see that now, a lot of publisher that print many kinds of book. The actual book that recommended to you is Creation in Crisis: Science, Ethics, Theology this e-book consist a lot of the information in the condition of this world now. This kind of book was represented how does the world has grown up. The words styles that writer require to explain it is easy to understand. The writer made some investigation when he makes this book. Honestly, that is why this book appropriate all of you.
