## **Editorial Review**

From the Back Cover

The rapid rate at which the field of digital picture processing has grown in the past five years had necessitated extensive revisions and the introduction of topics not found in the original edition.

### **About the Author**

The late Azriel Rosenfeld was a tenured research professor, a distinguished university professor, and the Founding Director of the Center for Automation Research at the University of Maryland in College Park, where he also held affiliate professorships in the departments of computer science, electrical engineering, and psychology. Dr. Rosenfeld was widely regarded as the leading researcher in the world in the field of computer image analysis. Over a period of nearly 40 years, he made fundamental and pioneering contributions to nearly every area of that field. He wrote the first textbook in the field, was founding editor of its first journal, and was co-chairman of its first international conference. He published over 30 books and over 600 book chapters and journal articles, and directed nearly 60 Ph.D. dissertations. Dr. Rosenfeld's research on digital image analysis—specifically on digital geometry and topology and the accurate measurement of statistical features of digital images in the 1960s and 1970s—formed the foundation for a generation of industrial vision inspection systems that have found widespread applications from the automotive to the electronics industry. He was a Fellow of the IEEE and the Washington Academy of Sciences; a Founding Fellow of the AAAI, the ACM, and the IAPR. Among his numerous awards and honors are the IEEE's Emanuel Piore Award, its Third Millennium Medal, and its Distinguished Service Award for Lifetime Achievement in Computer Vision and Pattern Recognition.

## **Users Review**

**From reader reviews:**

**Jennifer Perez:**

Spent a free the perfect time to be fun activity to try and do! A lot of people spent their down time with their family, or their own friends. Usually they doing activity like watching television, planning to beach, or picnic inside the park. They actually doing same task every week. Do you feel it? Do you need to something different to fill your free time/ holiday? Can be reading a book may be option to fill your free time/ holiday. The first thing that you'll ask may be what kinds of publication that you should read. If you want to consider look for book, may be the e-book untitled Digital Picture Processing, Volume 1, Second Edition (Computer Science and Applied Mathematics) can be fine book to read. May be it is usually best activity to you.

**Patrice Eubanks:**

The book untitled Digital Picture Processing, Volume 1, Second Edition (Computer Science and Applied Mathematics) contain a lot of information on the idea. The writer explains the girl idea with easy technique. The language is very clear to see all the people, so do not necessarily worry, you can easy to read this. The

book was written by famous author. The author gives you in the new time of literary works. It is possible to read this book because you can read more your smart phone, or product, so you can read the book within anywhere and anytime. In a situation you wish to purchase the e-book, you can open up their official website in addition to order it. Have a nice learn.

**Nichol Colby:**

Is it you who having spare time in that case spend it whole day by means of watching television programs or just laying on the bed? Do you need something new? This Digital Picture Processing, Volume 1, Second Edition (Computer Science and Applied Mathematics) can be the reply, oh how comes? It's a book you know. You are consequently out of date, spending your spare time by reading in this brand new era is common not a geek activity. So what these textbooks have than the others?

**Mitchell Wilder:**

As a college student exactly feel bored to reading. If their teacher questioned them to go to the library or to make summary for some publication, they are complained. Just very little students that has reading's soul or real their hobby. They just do what the trainer want, like asked to go to the library. They go to generally there but nothing reading really. Any students feel that reading is not important, boring and also can't see colorful pictures on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore this Digital Picture Processing, Volume 1, Second Edition (Computer Science and Applied Mathematics) can make you feel more interested to read.
