Drosophila: A Laboratory Handbook By Michael Ashburner, Kent Golic, R. Scott Hawley

The second edition of the highly successful grey book *Drosophila: A Laboratory Handbook*, first published in 1989, has been completely updated to reflect advances in techniques and knowledge. The original format is maintained, providing a handy reference guide to most aspects of the biology of *Drosophila*. Each of the thirty six chapters summarizes the present state of the subject, written with a historical perspective, but with an emphasis on the practical use of genetic and other methods. Extensively referenced.

Editorial Review

About the Author

Ashbruner is Professor of Biology in the Department of Genetics at the University of Cambridge. By training and inclination, he is a Drosophila geneticist, although for more than a decade, he has not been where he belongs-the lab bench-but in front of computer screens. He spent six years at the European Bioinformatics Institute, first as the Institute's Research Programme Coordinator, and then as its Joint-Head. He is a fellow of the Royal Society and an Honorary Foreign Member of the American Academy of Arts and Sciences.

R. Scott Hawley is a Senior Scientist at the Stowers Institute of Medical Research. Before joining the Stowers Institute in 2001, he was a Professor of Genetics at the University of California at Davis for 10 years. An accomplished textbook author, he has also published over 50 papers and articles in scientific journals. He has also served on the Board of Directors of the Genetics Society of America and is currently on the Editorial Board of "Genetics."

Michelle Walker is an Intellectual Property Specialist for Galileo Laboratories in Santa Clara, California. She earned an MS in Genetics from the University of California at Davis, has written several scientific articles, served as an Editor for the entomological journal "Sociobiology," and spent numerous hours volunteering her time in the field of bioethics and as a scientific mentor for inner-city children.
