Landmark Writings in Western Mathematics 1640-1940 From Elsevier Science

This book contains around 80 articles on major writings in mathematics published between 1640 and 1940. All aspects of mathematics are covered: pure and applied, probability and statistics, foundations and philosophy. Sometimes two writings from the same period and the same subject are taken together. The biography of the author(s) is recorded, and the circumstances of the preparation of the writing are given. When the writing is of some lengths an analytical table of its contents is supplied. The contents of the writing is reviewed, and its impact described, at least for the immediate decades. Each article ends with a bibliography of primary and secondary items.

- First book of its kind
- Covers the period 1640-1940 of massive development in mathematics
- Describes many of the main writings of mathematics
- Articles written by specialists in their field

Editorial Review

Review

"This remarkable book is itself a landmark publication in history of mathematics...The book is a must item for every mathematical library." --**Zentralblatt Math**

"This ecumenical feature will ensure that even professional historians of mathematics will find something new in this most welcome addition to the literature on the history of modern mathematics and its applications." --**Mathematical Reviews**

"This beautifully produced book comes with several very fine pictures and figures, as well as useful indices. The anthology presents the full nuances of the historical process, chances (theories) both realized and acknowledged or rejected, which results in a level of discussion to which all scholarly work on the history of mathematics should aspire." --**Richard Siegmund-Schultze (Agder University College)**

Users Review

From reader reviews:

Robert Lee:

What do you think of book? It is just for students because they are still students or the idea for all people in the world, what the best subject for that? Merely you can be answered for that problem above. Every person has diverse personality and hobby for each and every other. Don't to be pressured someone or something that they don't need do that. You must know how great and important the book Landmark Writings in Western Mathematics 1640-1940. All type of book can you see on many sources. You can look for the internet methods or other social media.

Jerald Higgins:

Now a day people who Living in the era just where everything reachable by interact with the internet and the resources in it can be true or not need people to be aware of each facts they get. How many people to be smart in obtaining any information nowadays? Of course the answer is reading a book. Studying a book can help men and women out of this uncertainty Information mainly this Landmark Writings in Western Mathematics 1640-1940 book because this book offers you rich info and knowledge. Of course the details in this book hundred per-cent guarantees there is no doubt in it you may already know.

William Kelley:

Information is provisions for individuals to get better life, information nowadays can get by anyone with

everywhere. The information can be a expertise or any news even restricted. What people must be consider when those information which is inside the former life are challenging to be find than now could be taking seriously which one is appropriate to believe or which one often the resource are convinced. If you find the unstable resource then you understand it as your main information you will have huge disadvantage for you.
