Learning from Accidents By Trevor A. Kletz

Review of previous edition:

"Trevor Kletz's book makes an invaluable contribution to the systematic, professional and scientific approach to accident investigation". The Chemical Engineer

Fully revised and updated, the third edition of Learning from Accidents provides more information on accident investigation, including coverage of accidents involving liquefied gases, building collapse and other incidents that have occurred because faults were invisible (e.g. underground pipelines).

By analysing accidents that have occurred Trevor Kletz shows how we can learn and thus be better able to prevent accidents happening again. Looking at a wide range of incidents, covering the process industries, nuclear industry and transportation, he analyses each accident in a practical and non-theoretical fashion and summarises each with a chain of events showing the prevention and mitigation which could have occurred at every stage.

At all times Learning from Accidents, 3rd Edition emphasises cause and prevention rather than human interest or cleaning up the mess. Anyone involved in accident investigation and reporting of whatever sort and all those who work in industry, whether in design, operations or loss prevention will find this book full of invaluable guidance and advice.

Editorial Review

Review

'By analysing accidents that have occurred, Trevor Kletz shows how we can learn from them and thus be better able to prevent them happening again....this book is a must for all maintenance, production and process engineers, design engineers, safety engineers and all those interested in safety and accident prevention.'

Chemical Industry Digest. Mar/Apr 2002

"Trevor Kletz's book makes an invaluable contribution to the systematic, professional and scientific approach to accident investigation". The Chemical Engineer

"I would recommend this book for all those with responsibility for health and safety".

Chemistry and Industry

"Trevor Kletz's excellent publication...the text is written in a style which is easy to understand, assimilate and put into practice". Health and Safety Focus Sep 1994

From the Publisher

Fully revised and updated, the third edition of Learning from Accidents provides more information on accident investigation, including coverage of accidents involving liquefied gases, building collapse and other incidents that have occurred because faults were invisible (e.g. underground pipelines). By analysing accidents that have occurred Trevor Kletz shows how we can learn and thus be better able to prevent accidents happening again. Looking at a wide range of incidents, covering the process industries, nuclear industry and transportation, he analyses each accident in a practical and non-theoretical fashion and summarises each with a chain of events showing the prevention and mitigation which could have occurred at every stage. At all times Learning from Accidents, 3rd Edition emphasises cause and prevention rather than human interest or cleaning up the mess. Anyone involved in accident investigation and reporting of whatever sort and all those who work in industry, whether in design, operations or loss prevention will find this book full of invaluable guidance and advice.

About the Author

Trevor Kletz, OBE, D.Sc., F.Eng., a process safety consultant, has published more than a hundred papers and nine books on loss prevention and process safety, including most recently *Lessons From Disaster: How Organizations Have No Memory* and *Accidents Recur and Computer Control and Human Error*. His experience includes thirty-eight years with Imperial Chemical Industries Ltd., where he served as a production manager and safety adviser in the petrochemical division, and membership in the department of chemical engineering at Loughborough University, Leicestershire, England. He is currently senior visiting research fellow at Loughborough University and an officer of the Order of the British Empire.

Users Review

From reader reviews:

Darrell Fowler:

As people who live in the actual modest era should be up-date about what going on or data even knowledge to make these individuals keep up with the era that is always change and progress. Some of you maybe can

update themselves by reading books. It is a good choice to suit your needs but the problems coming to an individual is you don't know what one you should start with. This Learning from Accidents is our recommendation to help you keep up with the world. Why, because book serves what you want and want in this era.

Charles Simpson:

Do you considered one of people who can't read gratifying if the sentence chained in the straightway, hold on guys this particular aren't like that. This Learning from Accidents book is readable simply by you who hate the straight word style. You will find the data here are arrange for enjoyable examining experience without leaving perhaps decrease the knowledge that want to provide to you. The writer regarding Learning from Accidents content conveys the thought easily to understand by a lot of people. The printed and e-book are not different in the content material but it just different available as it. So , do you nonetheless thinking Learning from Accidents is not loveable to be your top list reading book?

Hermelinda Anthony:

Often the book Learning from Accidents has a lot associated with on it. So when you check out this book you can get a lot of benefit. The book was compiled by the very famous author. McDougal makes some research prior to write this book. This book very easy to read you can obtain the point easily after looking over this book.

Sharon Edwards:

Your reading 6th sense will not betray anyone, why because this Learning from Accidents guide written by well-known writer who knows well how to make book that could be understand by anyone who all read the book. Written in good manner for you, leaking every ideas and publishing skill only for eliminate your personal hunger then you still doubt Learning from Accidents as good book not simply by the cover but also with the content. This is one reserve that can break don't assess book by its deal with, so do you still needing a different sixth sense to pick this specific!? Oh come on your looking at sixth sense already told you so why you have to listening to another sixth sense.
