The Wolf: The Ecology and Behavior of an Endangered Species, By L. David Mech

Throughout the continents of Eurasia and North America primitive man evolved in association with wolves. Wolves competed with him as a hunter, and raided his flocks and herds. Inevitably, folklore became rich in tales of this powerful, resourceful creature. Europeans reached North America with their attitudes already formed. The wilderness pressed in upon their tiny settlements in constant threat and all energies were devoted to destroying it and turning its inexhaustible resources to use. Over vast areas of the continent the wolf went down with the wilderness before the unprecedented effectiveness of our technological attack on the ecology of a continent. Today, however, there is a great tide of concern over the consequences of our assault on the wild lands and wild creatures on the continent, and more and more biologists are devoting their knowledge and energy to searching studies of our land and its native biota. The wolf has been the subject of detailed study by a number of ecologists on this continent who make use of all the research devices now available. Much of our knowledge is very recent, is increasing rapidly, and has resulted from the work of a mere handful of keen, resourceful, and courageous students of wolf biology. This, the first book to attempt a complete account of the biology of the wolf, draws from years of field research and upon the rich literature from two continents.

Editorial Review

Users Review

From reader reviews:

Jim Martin:

In this 21st one hundred year, people become competitive in each way. By being competitive at this point, people have do something to make them survives, being in the middle of typically the crowded place and notice simply by surrounding. One thing that occasionally many people have underestimated the idea for a while is reading. Yep, by reading a book your ability to survive improve then having chance to remain than other is high. For yourself who want to start reading the book, we give you this The Wolf: The Ecology and Behavior of an Endangered Species, book as starter and daily reading guide. Why, because this book is more than just a book.

Mary Rohe:

People live in this new moment of lifestyle always attempt to and must have the time or they will get lot of stress from both day to day life and work. So , once we ask do people have free time, we will say absolutely of course. People is human not just a robot. Then we request again, what kind of activity do you have when the spare time coming to you actually of course your answer will probably unlimited right. Then ever try this one, reading books. It can be your alternative throughout spending your spare time, the particular book you have read is actually The Wolf: The Ecology and Behavior of an Endangered Species,.

Luther Keller:

Do you have something that you prefer such as book? The reserve lovers usually prefer to opt for book like comic, small story and the biggest some may be novel. Now, why not attempting The Wolf: The Ecology and Behavior of an Endangered Species, that give your entertainment preference will be satisfied simply by reading this book. Reading routine all over the world can be said as the opportunity for people to know world a great deal better then how they react to the world. It can't be said constantly that reading routine only for the geeky particular person but for all of you who wants to end up being success person. So , for every you who want to start examining as your good habit, you may pick The Wolf: The Ecology and Behavior of an Endangered Species, become your current starter.

Jessica Seymore:

What is your hobby? Have you heard this question when you got students? We believe that that query was given by teacher on their students. Many kinds of hobby, Everyone has different hobby. And also you know that little person such as reading or as reading through become their hobby. You need to understand that

reading is very important and also book as to be the factor. Book is important thing to provide you knowledge, except your personal teacher or lecturer. You find good news or update about something by book. Amount types of books that can you go onto be your object. One of them are these claims The Wolf: The Ecology and Behavior of an Endangered Species.,
