## **A Tradecraft Primer: Structured Analytic Techniques for Improving Intelligence Analysis - Cognitive and Perceptual Biases, Reasoning Processes**

*By Central Intelligence Agency (CIA)*

This primer highlights structured analytic techniques—some widely used in the private sector and academia, some unique to the intelligence profession. It is not a comprehensive overview of how intelligence officers conduct analysis. Rather, the primer highlights how structured analytic techniques can help one challenge judgments, identify mental mindsets, stimulate creativity, and manage uncertainty. In short, incorporating regular use of techniques such as these can enable one to structure thinking for wrestling with difficult questions.

Using the analytic techniques contained in this primer will assist analysts in dealing with the perennial problems of intelligence: the complexity of international developments, incomplete and ambiguous information, and the inherent limitations of the human mind. Understanding the intentions and capabilities of adversaries and other foreign actors is challenging, especially when either or both are concealed. Moreover, transnational threats today pose even greater complexity, in that they involve multiple actors—including nonstate entities—that can adapt and transform themselves faster than those who seek to monitor and contain them. Finally, globalization has increased the diversity of outcomes when complex, interactive systems such as financial flows, regional economies or the international system as a whole are in flux.

The first hurdle for analysts is identifying the relevant and diagnostic information from the increasing volume of ambiguous and contradictory data that is acquired through open source and clandestine means. Analysts must also pierce the shroud of secrecy—and sometimes deception—that state and nonstate actors use to mislead. A systematic approach that considers a range of alternative explanations and outcomes offers one way to ensure that analysts do not dismiss potentially relevant hypotheses and supporting information resulting in missed opportunities to warn.

Cognitive and perceptual biases in human perception and judgment are another important reason for analysts to consider alternatives. As Richards Heuer and others have argued, all individuals assimilate and evaluate information through the medium of "mental models" (sometimes also called "frames" or "mind-sets"). These are experience-based constructs of assumptions and expectations both about the world in general and more specific domains. These constructs strongly influence what information analysts will accept—that is, data that are in accordance with analysts' unconscious mental models are more likely to be perceived and remembered than information that is at odds with them.

Mental models are critical to allowing individuals to process what otherwise would be an incomprehensible volume of information. Yet, they can cause analysts to overlook, reject, or forget important incoming or missing information that is not in accord with their assumptions and expectations. Seasoned analysts may be more susceptible to these mind-set problems as a result of their expertise and past success in using time-tested mental models. The key risks of mindsets are that: analysts perceive what they expect to perceive; once formed, they are resistant to change; new information is assimilated, sometimes erroneously, into existing mental models; and conflicting information is often dismissed or ignored. Intelligence analysts should be self-conscious about their reasoning processes. They should think about how they make judgments and reach conclusions, not just about the judgments and conclusions themselves.

### **Editorial Review**

### **Users Review**

#### **From reader reviews:**

##### **Allen Brown:**

This A Tradecraft Primer: Structured Analytic Techniques for Improving Intelligence Analysis - Cognitive and Perceptual Biases, Reasoning Processes are usually reliable for you who want to certainly be a successful person, why. The main reason of this A Tradecraft Primer: Structured Analytic Techniques for Improving Intelligence Analysis - Cognitive and Perceptual Biases, Reasoning Processes can be one of many great books you must have is giving you more than just simple reading food but feed anyone with information that possibly will shock your preceding knowledge. This book is usually handy, you can bring it almost everywhere and whenever your conditions throughout the e-book and printed ones. Beside that this A Tradecraft Primer: Structured Analytic Techniques for Improving Intelligence Analysis - Cognitive and Perceptual Biases, Reasoning Processes forcing you to have an enormous of experience including rich vocabulary, giving you trial run of critical thinking that we all know it useful in your day activity. So , let's have it appreciate reading.

##### **Percy Brown:**

A lot of people always spent their particular free time to vacation as well as go to the outside with them family or their friend. Do you realize? Many a lot of people spent many people free time just watching TV, as well as playing video games all day long. If you want to try to find a new activity that's look different you can read any book. It is really fun in your case. If you enjoy the book which you read you can spent 24 hours a day to reading a book. The book A Tradecraft Primer: Structured Analytic Techniques for Improving Intelligence Analysis - Cognitive and Perceptual Biases, Reasoning Processes it doesn't matter what good to read. There are a lot of people that recommended this book. These people were enjoying reading this book. If you did not have enough space to create this book you can buy the particular e-book. You can m0ore easily to read this book out of your smart phone. The price is not to fund but this book offers high quality.

##### **Shawn Jones:**

This A Tradecraft Primer: Structured Analytic Techniques for Improving Intelligence Analysis - Cognitive and Perceptual Biases, Reasoning Processes is great publication for you because the content that is full of information for you who have always deal with world and possess to make decision every minute. This kind of book reveal it data accurately using great arrange word or we can say no rambling sentences inside. So if you are read that hurriedly you can have whole details in it. Doesn't mean it only provides you with straight forward sentences but hard core information with beautiful delivering sentences. Having A Tradecraft Primer: Structured Analytic Techniques for Improving Intelligence Analysis - Cognitive and Perceptual Biases, Reasoning Processes in your hand like finding the world in your arm, information in it is not

ridiculous one. We can say that no publication that offer you world in ten or fifteen small right but this book already do that. So , it is good reading book. Heya Mr. and Mrs. busy do you still doubt this?

**Ricky Bradley:**

In this period of time globalization it is important to someone to get information. The information will make you to definitely understand the condition of the world. The fitness of the world makes the information simpler to share. You can find a lot of recommendations to get information example: internet, newspaper, book, and soon. You can see that now, a lot of publisher that print many kinds of book. Often the book that recommended for you is A Tradecraft Primer: Structured Analytic Techniques for Improving Intelligence Analysis - Cognitive and Perceptual Biases, Reasoning Processes this e-book consist a lot of the information in the condition of this world now. This book was represented how can the world has grown up. The vocabulary styles that writer use for explain it is easy to understand. Often the writer made some analysis when he makes this book. Honestly, that is why this book appropriate all of you.
