Elemental Geosystems By Robert W. Christopherson

This book gives readers an *accessible*, systematic, non-mathematical, and visually appealing start in physical geography. It features a distinctive, holistic integration of human-Earth relationships, an applied flavor, scientific correctness, and superior graphics (remote sensing images) and cartography. A holistic, process approach is used to describe and discuss each physical system. Highlights more than 200 URLs, and features an accompanying CD-ROM with more than 30 animations of key concepts in physical geography. Solar Energy, Seasons, and the Atmosphere. Atmospheric Energy and Global Temperatures. Atmospheric and Oceanic Circulations. Atmospheric Water and Weather. Global Climate Systems. Water Resources. The Dynamic Planet. Earthquakes and Volcanoes. Weathering, Karst Landscapes, and Mass Movement. River Systems and Landforms. Wind Processes and Desert Landscapes. The Oceans, Coastal Processes, and Landforms. Glacial and Periglacial Landscapes. The Geography of Soils. Ecosystems and Biomes. Earth and the Human Denominator. For anyone needing a non-mathematical introduction to physical geography.

Editorial Review

About the Author

Robert W. Christopherson attended California State University—Chico for undergraduate work and received his Masters in Geography from Miami University, Oxford, Ohio. He joined the American River College faculty in 1970, where he founded the geography program. He taught such courses as physical and cultural geography, weather and climate, humans and the environment, and humans in the urban environment from 1970 to 1999, and is currently Professor Emeritus.

Robert Christopherson is the recipient of numerous awards, including among others, the Patrons Chair and Student Association Teacher of the Year Awards at his college, most recently the 2005 President's Award and 2005 Textbook Award for *Elemental Geosystems*, 4/E, from the Text and Academic Authors Association, the 1999 Distinguished Teaching Achievement Award from the National Council for Geographic Education, the 1998 Textbook Award for *Geosystems*, 3/E, from TAA, and the California Geographical Society's 1997 Outstanding Educator Award.

Robert presented in seminar, television and radio, and research papers on topics such as, the physical geography of the polar regions, global climate change, energy issues, and environmental awareness. He and his professional photographer wife completed 5 polar expeditions, and attended the 2004 Arctic Climate Impact Symposium in Reykjavik, Iceland, to gain photo and video coverage, and research for *Geosystems* and *Elemental Geosystems*—his wife has more than 300 exclusive photos in each of these texts.

Users Review

From reader reviews:

Brittany Schafer:

The particular book Elemental Geosystems will bring someone to the new experience of reading the book. The author style to clarify the idea is very unique. If you try to find new book you just read, this book very suited to you. The book Elemental Geosystems is much recommended to you to read.
