Editorial Review

About the Author

John A. Carter, PhD, is the principal of Adlai E. Stevenson High School in Lincolnshire, Illinois. He previously served as the director of mathematics and the assistant principal for teaching and learning at Adlai E. Stevenson. He taught mathematics for nineteen years at Community High School in West Chicago and at Stevenson High School.

As a teacher and professional developer, Dr. Carter's work has focused on teaching mathematics for understanding, student engaged learning, and developing student reasoning. As a presenter and lesson-study facilitator, he regularly works with teachers to examine their instructional practices, further their content knowledge, and improve student achievement.

Dr. Carter has served on the Board of Directors for the National Council of Teachers of Mathematics as well as been a member of National Council of Teachers of Mathematics committees, task forces, and writing groups. He received the Presidential Award for Excellence in Mathematics Teaching in 1993 and was awarded the T. E. Rine Secondary Mathematics Teaching Award from the Illinois Council of Teachers of Mathematics in 2000.

Dr. Carter earned a bachelor's degree in mathematics, a master's degree in education, and a master's degree in educational administration from the University of Illinois at Urbana-Champaign. He earned his doctorate in mathematics education from Illinois State University and completed postdoctoral work in educational administration at Loyola University Chicago.

Users Review

From reader reviews:

Serafina Hayes:

What do you with regards to book? It is not important with you? Or just adding material when you want something to explain what you problem? How about your time? Or are you busy man? If you don't have spare time to perform others business, it is give you a sense of feeling bored faster. And you have extra time? What did you do? All people has many questions above. They have to answer that question because just their can do which. It said that about publication. Book is familiar on every person. Yes, it is correct. Because start from on guardería until university need this specific Advanced Mathematical Concepts: Precalculus with Applications to read.

David Betancourt:

Do you one among people who can't read pleasant if the sentence chained inside straightway, hold on guys this kind of aren't like that. This Advanced Mathematical Concepts: Precalculus with Applications book is readable through you who hate those straight word style. You will find the information here are arrange for

enjoyable looking at experience without leaving actually decrease the knowledge that want to offer to you. The writer regarding Advanced Mathematical Concepts: Precalculus with Applications content conveys the thought easily to understand by many individuals. The printed and e-book are not different in the content but it just different such as it. So , do you continue to thinking Advanced Mathematical Concepts: Precalculus with Applications is not loveable to be your top collection reading book?

Jean Hogue:

Nowadays reading books become more than want or need but also become a life style. This reading addiction give you lot of advantages. Advantages you got of course the knowledge the actual information inside the book that will improve your knowledge and information. The data you get based on what kind of publication you read, if you want attract knowledge just go with knowledge books but if you want sense happy read one with theme for entertaining for example comic or novel. The Advanced Mathematical Concepts: Precalculus with Applications is kind of publication which is giving the reader unforeseen experience.

Bruce Smith:

Do you really one of the book lovers? If so, do you ever feeling doubt when you find yourself in the book store? Try to pick one book that you never know the inside because don't judge book by its include may doesn't work here is difficult job because you are scared that the inside maybe not because fantastic as in the outside seem likes.
