Sustainable Renovation: Strategies for Commercial Building Systems and Envelope By Lisa Gelfand, Chris Duncan

The complete resource on performing sustainable renovations for both Historic and modern existing buildings

This forward-looking and insightful guide explores how the sustainable renovation of existing buildings presents great opportunities for initiating extensive changes in the performance of the built environment. Great examples of existing building upgrades are examined, illustrating how to do sustainable renovations, along with current design approaches for radically improving the functionality of existing prewar, postwar, and late modern buildings. *Sustainable Renovation* saves its key focus for institutional and commercial buildings, but discusses the challenges they pose within a global scope that encompasses all building practices. Some of the discussions in this book include:

- The significance of energy and resource demands by the building sector and the urgency of reducing loads in existing buildings
- Management, design, and construction approaches to achieve major modernization in occupied buildings
- International case studies that focus on methods and benefits of successful sustainable transformations of existing building performance

Repurposing buildings to preserve style and add performance remains a work in progress as designers and builders discover new methods for improving sustainable practices and standards. With incremental modernization and operations strategies available for immediate implementation, this book demonstrates the different ways of thinking necessary when considering and attempting the integration of sustainable concepts into existing buildings—and enables readers to rethink the world that's built around them.

Editorial Review

About the Author

Lisa Gelfand, FAIA, LEED-AP, one of the preeminent experts in green design and construction, is Managing Principal of Gelfand Partners Architects (gelfand-partners.com) in San Francisco. With more than three decades of experience, Gelfand has been involved in all aspects of a project, including project management, design, planning, marketing, and staff management. Her firm has designed many award-winning sustainable buildings and renovations.

Chris Duncan, AIA, LEED-AP, has two decades of experience and is a principal and senior staff manager at Gelfand Partners Architects. Duncan has managed project teams through all phases of design and construction. He has special expertise in educational and residential design, particularly the modernization of early twentieth-century buildings. He is also involved in a variety of community and professional service projects.

Users Review

From reader reviews:

Frank Anderson:

Here thing why this particular Sustainable Renovation: Strategies for Commercial Building Systems and Envelope are different and trusted to be yours. First of all studying a book is good but it really depends in the content from it which is the content is as tasty as food or not. Sustainable Renovation: Strategies for Commercial Building Systems and Envelope giving you information deeper and different ways, you can find any reserve out there but there is no book that similar with Sustainable Renovation: Strategies for Commercial Building Systems and Envelope. It gives you thrill looking at journey, its open up your own personal eyes about the thing that will happened in the world which is maybe can be happened around you. You can bring everywhere like in playground, café, or even in your technique home by train. When you are having difficulties in bringing the branded book maybe the form of Sustainable Renovation: Strategies for Commercial Building Systems and Envelope in e-book can be your alternative.

Lou Whisenhunt:

A lot of people always spent their free time to vacation or even go to the outside with them family members or their friend. Did you know? Many a lot of people spent they free time just watching TV, or maybe playing video games all day long. If you need to try to find a new activity that is look different you can read the book. It is really fun for yourself. If you enjoy the book that you simply read you can spent the entire day to reading a reserve. The book Sustainable Renovation: Strategies for Commercial Building Systems and Envelope it is extremely good to read. There are a lot of individuals who recommended this book. We were holding enjoying reading this book. In case you did not have enough space bringing this book you can buy the particular e-book. You can m0ore quickly to read this book from the smart phone. The price is not too costly but this book features high quality.

Jill Williams:

In this era which is the greater man or woman or who has ability in doing something more are more precious than other. Do you want to become among it? It is just simple approach to have that. What you have to do is just spending your time very little but quite enough to enjoy a look at some books. On the list of books in the top checklist in your reading list is actually Sustainable Renovation: Strategies for Commercial Building Systems and Envelope. This book that is qualified as The Hungry Inclines can get you closer in getting precious person. By looking upwards and review this guide you can get many advantages.

Joseph Mattie:

As a university student exactly feel bored for you to reading. If their teacher requested them to go to the library as well as to make summary for some publication, they are complained. Just tiny students that has reading's soul or real their interest. They just do what the professor want, like asked to the library. They go to generally there but nothing reading significantly. Any students feel that studying is not important, boring and can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important to suit your needs. As we know that on this period of time, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this Sustainable Renovation: Strategies for Commercial Building Systems and Envelope can make you feel more interested to read.
