## **Editorial Review**

### **Review**

This new title in the Capstone Graphic Library series presents the drama of the first Moon landing and includes authentic astronaut-mission control conversations and detailed illustrations. Using bold, full-color graphic illustrations, this series portrays critical chapters in American history in a way that reluctant readers will find accessible. Simple, exciting text and vivid drawings work together to explain critical events that shaped the course of American history. For grades 3 and 4. --Lunar & Planetary Information Bulletin, Lunar & Planetary Institute; Issue 109; February 2007

When the Soviet Union launched the first satellite into space in 1957, many Americans felt let down. They wanted to see their country make a mark in the field of space exploration too. America made its first major space breakthrough in 1961 when Alan Shepherd became the first American and second human to go into space. President Kennedy was keen to see America do something important in what came to be called the race into space, and later in 1961, in a speech to Congress, Kennedy expressed his hope that America would land a man on the moon before the end of the decade. By December 1968, NASA had managed to get astronauts around the moon and back in the Apollo 8 mission. It was an enormous achievement and it was decided that if Apollo Missions 9 and 10 went well, NASA would attempt a moon landing. Both missions went perfectly and Apollo 11 was scheduled for July 1969. Thus it was that Michael Collins, Buzz Aldrin, and Neil Armstrong were ready and well rehearsed when they climbed aboard their spacecraft on July 16th, 1969. Five hundred million people around the world people watched as the Saturn V rocket blasted off at the Kennedy Space Center in Florida. On July 20th Neil Armstrong and Buzz Aldrin became the first people to walk on the moon and history was made. This book will give young readers a very real picture of what took place before, during, and after the historic first moon landing. Readers will see that there was a quite a rivalry between the Soviet Union and the United States which drove both countries to try to outdo one another in the race into space. An easy to follow text presented in a graphic novel format rich with illustrations makes this the perfect book for readers who prefer books with lots of artwork. This is one of large collection of titles in the Graphic Library series published by Capstone Press. --Through the Looking Glass Childrens Book Review, June 2007

This addition to Capstones Graphic Library series presents the drama of the first moon landing, complete with authentic astronaut-mission control talk and detailed illustrations, and a map at the back showing the locations of the six moon landings. Makes me want to go bust out the telescope to see if I can get a closeup of the landing sites. My one issue with this book, and maybe it couldnt really be avoided given the times and the subject matter, but in the whole book there are only two women portrayed, both mothers at home on the living room sofa with husband and son, making rather shallow observations of what theyre watching on TV. Could the moms not have made the science-based answers to their sons questions? And why isnt one of these kids a girl? Other than that gender bias, this is a great book and will certainly be a popular resource for students learning about the early years of the Unites States space program. --Smart Writers Journal, October 2006

### **About the Author**

Thomas K. Adamson has written dozens of nonfiction books for kids on sports, space, math, and more. He lives in Sioux Falls, South Dakota, with his wife and two sons. He likes reading and playing ball with his boys. He also likes to check scores and stats on his phone.

### **From reader reviews:**

#### **Stephen Conway:**

Book is to be different for every grade. Book for children until finally adult are different content. As you may know that book is very important usually. The book The First Moon Landing (Graphic History) was making you to know about other know-how and of course you can take more information. It is extremely advantages for you. The publication The First Moon Landing (Graphic History) is not only giving you much more new information but also to become your friend when you really feel bored. You can spend your own spend time to read your book. Try to make relationship with all the book The First Moon Landing (Graphic History). You never experience lose out for everything in the event you read some books.

#### **William Tietjen:**

As people who live in the particular modest era should be update about what going on or facts even knowledge to make them keep up with the era that is certainly always change and move forward. Some of you maybe will probably update themselves by examining books. It is a good choice for you but the problems coming to anyone is you don't know what type you should start with. This The First Moon Landing (Graphic History) is our recommendation to cause you to keep up with the world. Why, because book serves what you want and want in this era.

#### **Douglas Ayer:**

Your reading sixth sense will not betray anyone, why because this The First Moon Landing (Graphic History) book written by well-known writer who knows well how to make book that may be understand by anyone who also read the book. Written within good manner for you, dripping every ideas and creating skill only for eliminate your own hunger then you still question The First Moon Landing (Graphic History) as good book not merely by the cover but also through the content. This is one e-book that can break don't judge book by its protect, so do you still needing a different sixth sense to pick that!? Oh come on your examining sixth sense already told you so why you have to listening to an additional sixth sense.

#### **Randy Jones:**

As a university student exactly feel bored to be able to reading. If their teacher asked them to go to the library or to make summary for some e-book, they are complained. Just tiny students that has reading's heart or real their passion. They just do what the instructor want, like asked to go to the library. They go to there but nothing reading critically. Any students feel that examining is not important, boring and can't see colorful pictures on there. Yeah, it is to become complicated. Book is very important in your case. As we know that on this time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore this The First Moon Landing (Graphic History) can make you feel more interested to read.
