### The Musician's Guide to Theory and Analysis (The Musician's Guide Series)

By Jane Piper Clendinning, Elizabeth West Marvin

***The Musician's Guide to Theory and Analysis* covers the essential principles of diatonic and chromatic tonal harmony, systematically developing skills in part-writing, figured-bass realization, melody harmonization, counterpoint, stylistic composition and arranging, and music analysis, including contemporary music.**

The much-anticipated *Musician's Guide* series offers a comprehensive four-semester introduction to the skills of complete musicianship, seamlessly integrating theory and analysis, aural training, and performance in one pedagogical program.

*The Musician's Guide* series is divided into two main components, each represented by a core text. While complete enough to be used alone, these dynamic texts are fully coordinated, sharing the same pedagogical approach and structure. Each book relies on a core repertoire of real music that is revisited throughout in a variety of theory- and performance-based contexts. These texts are complemented by a rich collection of learning resources.
