#### Book Description:

Training Within Industry is the structural genesis of Lean Manufacturing and the heart of Kaizen, the practice of continuous improvements. From the Toyota Production System to the standardization of training retail sales clerks, Training Within Industry is one of the original document sets provided to Toyota after World War 2 by the United States Government and proves that Toyota's true innovation came from these structured documents. The training material contained in this 8.5 X 11 inches, 86 page Training Within Industry book is as applicable today as it was when it was first written down, decades ago.

The Job Instruction Training Program is based upon the idea that the proper instructing of employees is done not just by telling, but by showing, telling and following up. Because of the time taken to properly instruct its employees a company will see less scrap, rework and rejects, as well as see fewer accidents due to misinformation. The importance of a well instructed work force cannot be emphasized enough and through the use of this book you will discover how to:

- Properly instruct workers on their job
- Prepare and train instructors on how to train new employees
- Reduce training time and increase safety on the job
- Get continuous, positive results through training

This streamlined method of instruction can, and will, help in training both new and experienced workers and will dramatically cut down employee training time. Through the use of sample scenarios and discussion topics, the key elements to implementing a great training program are outlined. Through practice, breakdowns, and repetition the T.W.I. Job Instruction book leads the way to a greater, better trained work force. --Publisher
