Veterinary Neuroanatomy and Clinical Neurology, 3e By Alexander de Lahunta, Eric N. Glass MS DVM DACVIM (Neurology), Marc Kent DVM BA DACVIM

Organized by functional neurologic system, the 3rd edition of this authoritative reference provides the most up-to-date information on neuroanatomy, neurophysiology, neuropathology, and clinical neurology as it applies to small animals, horses, and food animals. Accurate diagnosis is emphasized throughout with practical guidelines for performing neurologic examinations, interpreting examination results, and formulating effective treatment plans. In-depth disease descriptions, color images, and video clips reinforce important concepts and assist with diagnosis and treatment.

- Expert authors bring more than 50 years of experience in veterinary neuroanatomy and clinical neurology to this book ? Dr. Alexander DeLahunta and Dr. Eric Glass offer their unique insights from both academic and practitioner perspectives.
- Disease content is presented in a logical case study format with three distinct parts:
 - Description of the disorder
 - Neuroanatomic diagnosis (including how it was determined, the differential diagnosis, and any available ancillary data)
 - Course of the disease (providing final clinical or necropsy diagnosis and a brief discussion of the syndrome)
- More than 600 full-color photographs and line drawings, plus approximately 150 high-quality radiographs, visually reinforce key concepts and assist in reaching accurate diagnoses.
- The book comes with free access to 370 video clips on Cornell University's website that directly correlate to the case studies throughout the book and clearly demonstrate nearly every recognized neurologic disorder.
- High-quality MR images of the brain are presented alongside correlating stained transverse sections for in-depth study and comparison.
- Vivid photos of gross and microscopic lesions clearly illustrate the pathology of many of the disorders presented in the book.

Editorial Review

Review

"The third edition really does cater for everyone; undergraduates, practitioners and specialist neurologists will all find this book an absolute delight. (...) The result is an outstanding combination of neuroanatomy, neuropathology and clinical neurology. A major innovation is the inclusion of text to compliment a series of video clips available for view on a Cornell website. The system works really well, drawing on the authors' vast archive of examples of clinical conditions in all domestic species. There are 382 video clips available, each one with relevant text in the book. (...) The attention to detail in this book is truly impressive and, if the reader wants further information on any topic, there is a comprehensive list of references at the end of each chapter. Much more could be said about this great book but I recommend buying it for oneself; it will be money well-spent."

- The European Journal of Companion Animal Practice, April 2009

Users Review

From reader reviews:

Howard Depriest:

Does one one of the book lovers? If so, do you ever feeling doubt if you are in the book store? Try and pick one book that you never know the inside because don't evaluate book by its cover may doesn't work here is difficult job because you are afraid that the inside maybe not since fantastic as in the outside look likes. Maybe you answer is usually Veterinary Neuroanatomy and Clinical Neurology, 3e why because the amazing cover that make you consider about the content will not disappoint you actually. The inside or content is actually fantastic as the outside or perhaps cover. Your reading sixth sense will directly make suggestions to pick up this book.

Carol Ratliff:

With this era which is the greater individual or who has ability in doing something more are more treasured than other. Do you want to become one among it? It is just simple strategy to have that. What you must do is just spending your time almost no but quite enough to enjoy a look at some books. One of several books in the top checklist in your reading list is definitely Veterinary Neuroanatomy and Clinical Neurology, 3e. This book and that is qualified as The Hungry Mountains can get you closer in becoming precious person. By looking up and review this reserve you can get many advantages.

Marilyn Calhoun:

As a scholar exactly feel bored to help reading. If their teacher questioned them to go to the library as well as to make summary for some publication, they are complained. Just very little students that has reading's internal or real their interest. They just do what the professor want, like asked to the library. They go to generally there but nothing reading critically. Any students feel that reading is not important, boring along

with can't see colorful pics on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this period, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore , this Veterinary Neuroanatomy and Clinical Neurology, 3e can make you truly feel more interested to read.

Nancy Herman:

Many people said that they feel bored when they reading a e-book. They are directly felt that when they get a half areas of the book. You can choose the book Veterinary Neuroanatomy and Clinical Neurology, 3e to make your current reading is interesting. Your current skill of reading proficiency is developing when you including reading. Try to choose simple book to make you enjoy to see it and mingle the feeling about book and examining especially. It is to be 1st opinion for you to like to open a book and go through it. Beside that the reserve Veterinary Neuroanatomy and Clinical Neurology, 3e can to be your brand new friend when you're feel alone and confuse using what must you're doing of the time.
