Networks: A Very Short Introduction (Very Short Introductions) By Guido Caldarelli, Michele Catanzaro

Networks are involved in many aspects of everyday life, from food webs in ecology and the spread of pandemics to social networking and public transportation. In fact, some of the most important and familiar natural systems and social phenomena are based on a networked structure. It is impossible to understand the spread of an epidemic, a computer virus, large-scale blackouts, or massive extinctions without taking into account the network structure that underlies all these phenomena. In this *Very Short Introduction*, Guido Caldarelli and Michele Catanzaro discuss the nature and variety of networks, using everyday examples from society, technology, nature, and history to illuminate the science of network theory. The authors describe the ubiquitous role of networks, reveal how networks self-organize, explain why the rich get richer, and discuss how networks can spontaneously collapse. They conclude by highlighting how the findings of complex network theory have very wide and important applications in genetics, ecology, communications, economics, and sociology.

Editorial Review

About the Author

Guido Caldarelli is Associate Professor in the Institute of Complex Networks of the National Research Council in Rome, Italy. He is an expert of scale-free networks and self-similar phenomena, especially of the applications of network theory to information technology and biology.

Michele Catanzaro is a freelance science writer based in Barcelona, Spain.

Users Review

From reader reviews:

Hallie Cathey:

Why don't make it to be your habit? Right now, try to ready your time to do the important work, like looking for your favorite guide and reading a publication. Beside you can solve your short lived problem; you can add your knowledge by the e-book entitled Networks: A Very Short Introduction (Very Short Introductions). Try to make the book Networks: A Very Short Introduction (Very Short Introductions) as your friend. It means that it can to get your friend when you sense alone and beside that course make you smarter than in the past. Yeah, it is very fortunated for you. The book makes you far more confidence because you can know every little thing by the book. So , let us make new experience and also knowledge with this book.

James Matter:

Within other case, little individuals like to read book Networks: A Very Short Introduction (Very Short Introductions). You can choose the best book if you love reading a book. So long as we know about how is important a book Networks: A Very Short Introduction (Very Short Introductions). You can add expertise and of course you can around the world by just a book. Absolutely right, simply because from book you can recognize everything! From your country until finally foreign or abroad you can be known. About simple factor until wonderful thing it is possible to know that. In this era, we can easily open a book or maybe searching by internet unit. It is called e-book. You need to use it when you feel fed up to go to the library. Let's read.

George Degregorio:

The book Networks: A Very Short Introduction (Very Short Introductions) can give more knowledge and also the precise product information about everything you want. Why then must we leave the best thing like a book Networks: A Very Short Introduction (Very Short Introductions)? Some of you have a different opinion about reserve. But one aim that will book can give many information for us. It is absolutely suitable. Right now, try to closer with your book. Knowledge or facts that you take for that, you could give for each other; you can share all of these. Book Networks: A Very Short Introduction (Very Short Introductions) has

simple shape but the truth is know: it has great and big function for you. You can appear the enormous world by open up and read a e-book. So it is very wonderful.

Thomas Taylor:

Spent a free time for you to be fun activity to complete! A lot of people spent their sparetime with their family, or their particular friends. Usually they accomplishing activity like watching television, going to beach, or picnic within the park. They actually doing same every week. Do you feel it? Do you want to something different to fill your own personal free time/ holiday? Could possibly be reading a book might be option to fill your totally free time/ holiday. The first thing that you will ask may be what kinds of book that you should read. If you want to attempt look for book, may be the reserve untitled Networks: A Very Short Introduction (Very Short Introductions) can be fine book to read. May be it can be best activity to you.
