Editorial Review

About the Author

Marge Lial (late) became interested in math at an early age—it was her favorite subject in the first grade! Marge's intense desire to educate both her students and herself inspired the writing of numerous best-selling textbooks. Marge, who received Bachelor's and Master's degrees from California State University at Sacramento, was affiliated with American River College. An avid reader and traveler, her travel experiences often found their way into her books as applications, exercise sets, and feature sets. She was particularly interested in archeology; trips to various digs and ruin sites produced some fascinating problems for her textbooks involving such topics as the building of Mayan pyramids and the acoustics of ancient ball courts in the Yucatan. We dedicate the new editions of the paperback developmental math series to Marge in honor of her contributions to the field in which she helped thousands of students succeed.

Diana Hestwood lives in Minnesota and has taught at Metropolitan Community College in Minneapolis for two decades. She has done research on the student brain and is an expert on study skills. She is the author of Lial/Hestwood's *Prealgebra* and coauthor of Lial/Salzman/Hestwood's *Basic Math* and Lial/Hestwood/Hornsby/McGinnis's *Prealgebra and Introductory Algebra*.

Users Review

From reader reviews:

Ellen Jones:

Reading a publication can be one of a lot of exercise that everyone in the world loves. Do you like reading book so. There are a lot of reasons why people enjoy it. First reading a e-book will give you a lot of new details. When you read a reserve you will get new information mainly because book is one of numerous ways to share the information or perhaps their idea. Second, looking at a book will make an individual more imaginative. When you examining a book especially tale fantasy book the author will bring that you imagine the story how the characters do it anything. Third, you are able to share your knowledge to some others.
